Subject: Re: Similar concept in China consultation contract

Thank you for your reply. I appreciate your support and will be sure that you are blessed financially and honored for your contribution to society.

I will be departing to China on the 18th of September and the discussion will include the building platforms for the new Cities. If you are able to forward the drawings, I will present them exactly as drawn by you.

My current address is:
4533 SpyGlass Drive,
Stockton, California 95219.
Alexander Gilbert Baraona, MA. PhD.

I look forward to meeting with you in person upon my return from China. I have a office in Shanghai and will make arrangements for a direct link to your home for Video Conferencing directly to the China Office and our office in California.

God Bless You and thank you again.

Sincerely yours,
Alexander G Baraona

Dear Alex:

I would be pleased to have you present my web as an example of what can be completed in China.

I welcome the opportunity to be a consultant in the building of the cities. I have some small but key drawings which were too numerous to be included on the Victory City website. I will be glad to send them to you when you are ready for them. I am unable to send them by E mail, but they could be sent by regular mail. For this I would need your mailing address.

I appreciate your offer of payments or fees. I am not concerned about this. I am 81 years old and worked on Victory City plans since 1960. My interest is to see it built, hopefully in my lifetime. If China builds the first Victory City, then China will be leading the world in the next great advance in civilization. The rest of the world will be watching and then following. It will be fascinating to see this happen. I hope I get to see it too.

Sincerely,

Orville.
