

Instructions: Each GUI is matched with a reuse direction, and four reuse results (A, B, C, and D). Please rank the four options, regarding the given reuse direction, in terms of those options' cleverness and creativity. Keep in mind that reuse here means: "using an existing artifact to create a new one", and hence, both respecting the existing GUI and creating the new GUI are important.

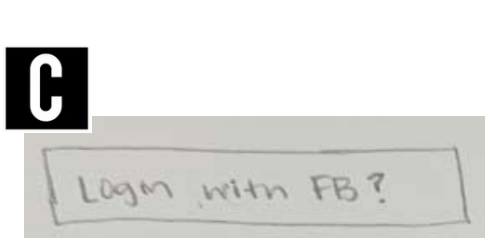

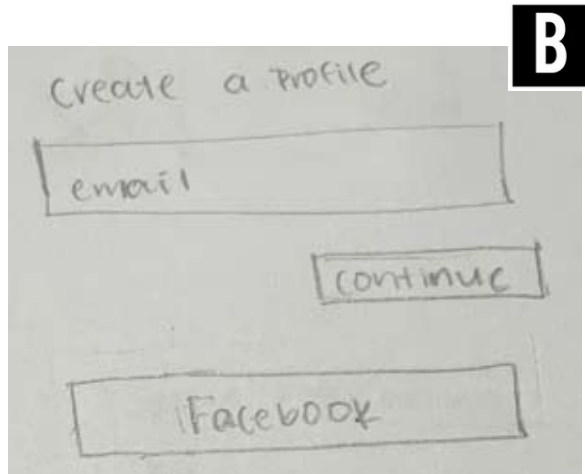

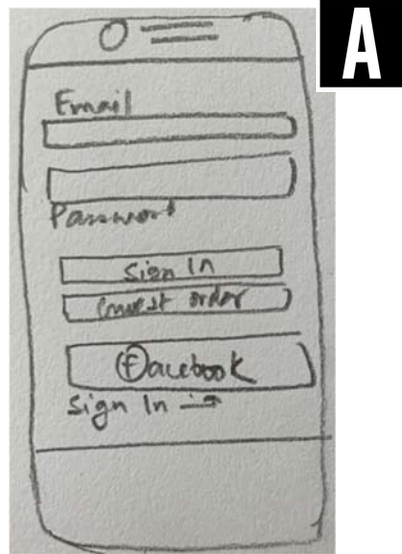

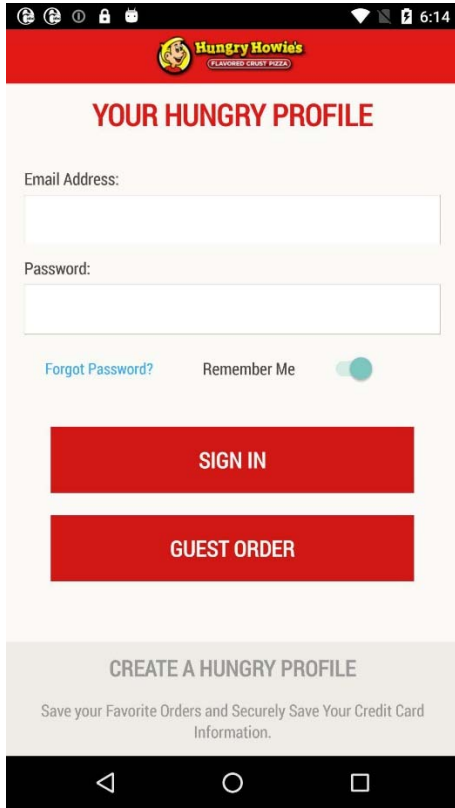

Each reuse result is manually drawn to highlight the revision made to only part of the GUI. Therefore, please ignore the drawing quality and treat the result as design sketch only. Please also understand the changes made to only a part of the GUI, and assess the result by positioning or imagining the changed part in the context of the whole GUI.

There are totally ten GUIs that are independent from each other. Please write down your rankings clearly, e.g., GUI-1: 1st=C, 2nd=B, 3rd=D, and 4th=A. Note that no tie is allowed, that is, a total ordering is required. Feel free to provide any additional comments. Thank you!

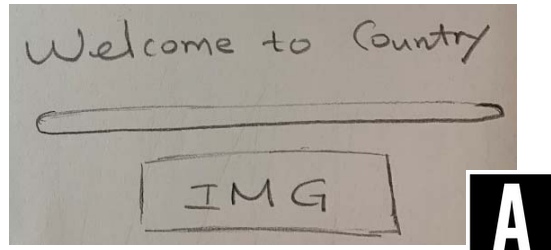

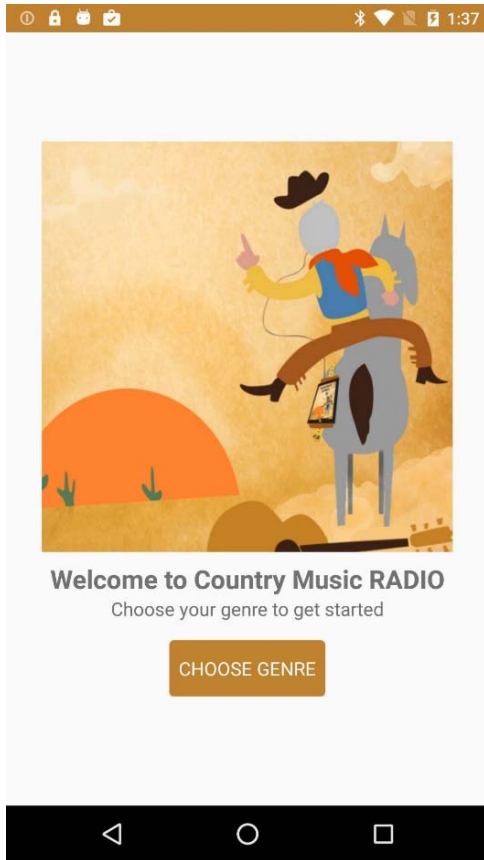

Original GUI-1 (see below) & the reuse direction= “search bar with shopping categories, discount advertisement and account maintenance”

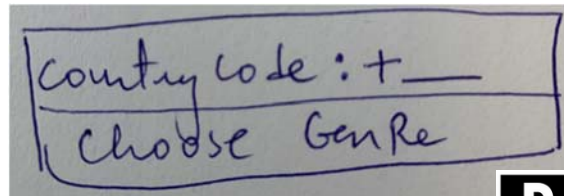

Original GUI-2 (see below) & the reuse direction= “signup with facebook login option”

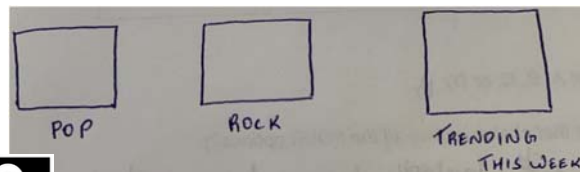

Original GUI-3 (see below) & the reuse direction= "Country code listing"

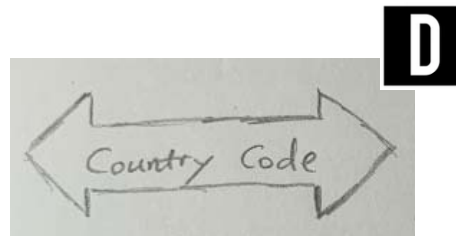

**A**

**B**

**C**

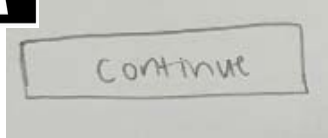

**D**

Original GUI-4 (see below) & the reuse direction= “information description with login button”

**A**
