11.III.01

end 3:10 pm and attempt to remove land rover (Lorena's) from mud. Lots of mud today b/c of heavy rain last night.

Today we started before lunch, ate lunch + did training. Working to N of reservoir in area 6, in tracts above the (dirt/mud) road + below a household complex. Most fields are under cultivation, but direction of plowing does not always follow contour. Fields were plowed bare + planted or under grass. Some erosion of modern horse tile + debris downslope, esp. in B003 → E edge of B005. But rather material mixed in.

SITE 004
B056/065 + ASSOC.
plateau extending E from coastal ridge w/ views down to 2 valleys (6+5). Densest concentration at top of plateau where rough plowing makes visibility good.
fond - Hell. fireware base
knoll is terraced + w/ bunkers at top - material washes down in gully to N, down all sides of knoll, + is visible in scarps below road to S.
GPS point at bunker - top of B056
fond - A./cl ptd tile (cover) in B056

SITE 005 dated
~~threshold~~ assoc. w/ lower wall taken to museum by previous director w/ 3 rosettes. probably can be found. → 1m x 60cm x 5-6cm.
Afnm dates wall 4th/6th
GPS point at lower wall.
