

If the "Acceptable" and "Not Recommended" sections prove in actual practice to be too bulky and costly, it might be necessary to trim first the "Not Recommended" and later the "Acceptable". It might become necessary to limit each person to one article each week or month.

Possibly the "Acceptable" section could be sub-divided into 2 or 3 sections based on the quality and interest of the message. These in turn could be divided according to subject matter.

If, due to financial limitations, it is decided that it would be too costly to make the capital investment necessary to establish a newspaper, then VC could enter into an agreement to allow an outside newspaper to locate in VC providing they agree fully to the people's free message plan and in return VC will agree not to rent space to a rival newspaper in the same VC. However any and all other newspapers of the outside world or any other type of publication may be sold in VC and this should be encouraged.

The people's free message plan will be the mechanical means for everybody in a VC to communicate with everyone else in the same VC. It will be the first time in history that this will have been possible on such a large scale. It should help lead to mutual understanding and concern and provide a public platform for the expression of totally new ideas without a traditionally minded newspaper censor with a third rate mind interfering with the free public expression of new ideas by a second or first rate mind or any other rated mind.

1st & 2nd FLOORS RESERVED FOR FAMILIES WITH BABIES

Families with new born babies will have first chance to rent apts. on 1st & 2nd floor. The oldest baby in this area must move up to make room for the new born. The oldest baby moving up to the 3rd floor has priority and the oldest infant there must move up to the 4th floor, where he has priority and the oldest child on the 4th floor must move up to the 5th, etc. until they are old enough to go to 1st grade of school by themselves, or are 6 years of age, then they lose all priority.

First floor apts. will have small private patios fenced off in the park area and next to the apt. itself. This is where the mother is expected to put her baby when the sun shines or the weather is otherwise favorable. The 2nd floor apts. will also have private fenced patios in the courtyards. The infants on the 3rd floor and the small children on the 4th will play in either the courtyard or park areas. Being on a lower floor their mothers will not have far to take them so that they may play outside.

VC TRASH & GARBAGE DISPOSAL

In the old obsolete cities about 90% of the trash coming from each house also comes from the kitchen of that house in the form of some kind of food or cleanser or spray container made out of paper, cardboard, plastic, metal or glass. In VC this 90% of
