

Enabling Legislation and Congress

It may be necessary for the greatest possible success of Victory City for Congress to pass enabling legislation in various areas where present law would inadequately cover or not cover at all. Victory City will be the creation of something radically different for which there is no precedent and therefore the people who wrote all our present law could not have foreseen Victory City or given it any consideration.

The very existence of Victory City is in the national and world interest. Instead of receiving huge sums of money from the federal government for Urban Renewal and other projects as all other cities do, Victory City not only will not receive any such money but in many instances will save the government money as in the post office low cost mail delivery. In addition to this Victory Cities will be of great assistance in such national problems as air and water pollution, and conservation of our natural resources.

The enabling legislation Victory Cities will need will cost the government nothing. All that is needed is the time of the members of Congress to write and enact the legislation.

Victory Cities Will Provide Public Services for Residents of Victory Cities

Victory Cities will provide: schools, hospitals, free elevator transportation vs. cars, build highways, circle expressways, ramps, bridges and parking lots. Provide: utilities, water, electricity, heat, air conditioning, trash and garbage removal, sewage disposal system, police and fire protection, retirement home of the elderly, and provide a comprehensive health plan for everyone.

Victory Cities will relieve residents of the necessity of buying or renting houses or apartments with kitchens, dining rooms and dinettes. The cost to include these rooms will be eliminated in Victory City since they will not need to be included and the residents therefore will not have this cost to pay in the form of higher rent.
