

trash is eliminated before it ever gets started because the apts. have no kitchens and the one large kitchen on the first floor will be using permanent type containers to process, cook & serve the fresh vegetables, meats and fruits and dairy products, coming to VC each day, and cooked and consumed the same day.

Whatever temporary containers are used will be recycled to recover the metal and glass contents. The lack of a transportation cost by being concentrated in one area will be one contribution to efficiency and economy in VC's recycling process and general trash disposal. The garbage could be fed to pigs to supplement their food and the unusable garbage ground up for fertilizer for VC's nearby farmland or it could all be used for fertilizer.

COURTYARD VENTILATION - SCREENED AREA

Portions of the tower section of the building will have screened outer walls and no interior walls, just supporting columns, in order to allow fresh air to circulate through the courtyard and keep them perpetually ventilated. These screened areas in effect would be public screened porches and would contain porch furniture, ping-pong tables, pool tables, card tables, poker tables, soft drink dispenser, juke boxes, bad-minton, croquet, shuffle-board, all types of games, summer library and others. The above items would be in varying combinations in each individual porch. These porches will be located at each corner of the courtyard and in the middle on the 3rd & 4th floors and at the corners only on floors No. 12, 20, 28, 36, 44, 52, 60, 68, 76, 84, 92. (13 floors with porches)

These porch areas could be used for summer school, nursery school, kindergarten. Working mothers could leave their children in organized educational porch workshops. The porches will be ideal havens for people on a rainy day in the summer. They will also be pleasant meeting places for teenagers and other groups such as the retired or senior citizens.

PETS. DOGS. CATS. KENNELS. VETERINARY

Caged birds, gold fish and certain other types of pets will be allowed in apts. Dogs, cats and other types will not be allowed in apts. or in the bldg. but instead will be allowed in a specially designed "Pet Park", to be located in a section of the regular park surrounding the outside of the bldg. The "Pet Park" will include a heated bldg. for the kitchen, pet shop, veterinary offices & facilities and shelter for the pets at night and in the winter,

Arrangements will be made so that people can go on trips and know their pet will be taken care of. Each pet would have his own shelter and fenced outdoor area. When visited by his owner, the owner can take the pet around the pet park on a leash. The owner can feed his own pet or make arrangements for a pet park attendant to do all or any part of the feeding. The total costs of all these services will be added on to the pet's owner's apt. rent and taken off his bank account each month along with his apt. rent.
