

SUMMER SCHOOL

The VC educational system should be continuous and include activities of a wide variety on weekends, both Sat. & Sun. & all summer long. The valuable facilities will be there and paid for. So why not use them all the time. And why waste the child's timeable time. Once time is gone, it never comes back. The summer school should include frequent activity outdoors with plenty of sun, fresh air and exercise, and student's free time to do as he wants. Useful activities such as picking vegetables and fruits on the nearby farms surrounding VC should be included on the teenagers' summer program.

ENABLING LEGISLATION - CONGRESS

It may be necessary for the greatest possible success of VC, for Congress to pass enabling legislation in various areas where present law would inadequately cover or not cover at all. VC will be the creation of something radically different for which there is no precedent and therefore the people who wrote all our present law could not have foreseen VC or given it any consideration.

The very existence of VC is in the national & world interest. Instead of receiving huge sums of money from the federal government for Urban Renewal and other projects as all other cities do, VC not only will not receive any such money but in many instances will save the government money as in the post office low cost mail delivery. In addition to this VC's will be of great assistance in such national problems as air and water pollution, and conservation of our natural resources.

The enabling legislation VC's will need will cost the government nothing. All that is needed is the time of the members of Congress to write and enact the legislation.

LAND ACQUISITION

VC may need the assistance of government to apply the power of eminent domain to appropriate the desirable type country or farmland in sufficient acreage upon which to build even a small VC. This is right and fair because it is in the public interest. The railroads acquired a tremendous amount of land in this manner because people of vision recognized it to be in the public interest. As a result the railroads contributed mightily to the growth, development and prosperity of our nation, enriching everyone's lives directly or indirectly. This is somewhat of a precedent but it is not clear whether present law could apply in a similar manner to VC.

TAX FREE STATUS OF VC COMMON STOCK

VC will be both a private corporation for profit and a city with everything that goes with any other city and offering everything that any other city might offer. The directors of VC take the place of city council and the executive officers take the place of department directors. In every way VC will act as a municipality.
