

Victory City (VC)

Main Elevator Building (MEB)

The MEB will be the chief form of transportation in VC. Within the city it will replace cars, trucks, buses, vans, motorcycles, mopeds, bicycles, etc. Use of these vehicles for VC would possibly be about 5% - 10% as much as in an old obsolete city. In Victory City, cars etc. would continue to be used for transportation between VC and other cities.

The 90% - 95% of car etc. type of transportation that's eliminated by the elevator is pure savings, and this is an enormous savings every day. Unlike cars, trucks, buses etc., the elevator system will be inexpensive, fast, safe, quiet and free of carbon monoxide air pollution. The savings can be measured in money or energy or gas & oil.

The MEB will be surrounded by residential buildings on the East, West & South sides and the Commercial Building on the North side. All of these buildings will be 102 floors high, 60 feet apart and connected to the MEB with ramps on all 102 floors.

Separate Building Advantage

Advantage to having the elevator in a separate building is that it accommodates 4 buildings instead of one, being centrally located. However, by far the most important and primary reason is the superior and safer manner in which one of the buildings could be evacuated in case of fire. The electrical source for the entire Main Elevator Building will be entirely separate and independent from that of the other buildings. This will enable the elevators to continue to operate and operate safely in the event of a major fire in one of the other buildings.

The ramps connecting the other buildings to the elevator building would have fire doors at each end.

Main Elevator Lobby (MEL)

Sky Lobby (SL)

Extra Large Elevator (ELE)

The MEB will be divided into 9 sections approximately equal in number of floors and located one over the other. The 3 MEL's are in the lowest section on the 1st, 5th, & 9th floors. 8 ELE's capable of carrying about 50 people each are included. 3 ELE's start on the 1st floor; 3 on the 5th floor and 2 on the 9th floor. There will be a sky lobby located on the 13th, 25th, 37th, 48th, 59th, 70th, 81st, and 92nd floors. Each ELE will have its own SL and will continually make trips between its' MEL and SL.
