Orville -

What CEO of a company would be using a free email account through Yahoo??!!

alexgbaraona@yahoo.com

Don't you think his email address would be something like
alexgbaraona@salvadoreholdings.com???

If you want to have some fun with him, continue to exchange emails with him and string him along!

Just remember, his ultimate goal may be to defraud you of your cash!!

Thank you for your reply. I appreciate it very much. I would like to present your web site as a example of what can be completed in China.

Will that be OK with you. I would like your design and creation to take all of the credit. Perhaps your organization can be our engineering consultants in the building of the cities. This would help us greatly. We are happy to pay your organization as required.

If you have an interest please email me your fee requirements.

Sincerely yours,

Alexander G. Baraona, MA. PhD.
CEO/Chairman
Salvador Holdings International Corporation

Dear Alex:

Thank you for your interesting letter. To build a city for 2,400,000 people using the Victory City plan you would need a minimum of 22.5 square miles.
